

Not-For-Profit Organizations

Supporting 200 Plus Tax Exempt Clients

Bond Beebe understands the not-for-profit industry and provides assistance to those charged with governance in the operations and strategic direction of these entities. We ensure your compliance needs are addressed and provide ideas to help in achieving your mission.

We Start By Understanding Your Goals

Understanding your unique goals and obstacles helps us develop solutions that add value to your organization.

Financial Support Options

We pride ourselves on tailoring our services to your needs. We can provide audit services and Form 990 preparation to your entity or work in collaboration with your current auditor to perform reconciliations and provide other audit preparation support. Our outsourced accounting group can become your complete accounting solution, manage existing accounting staff and if needed, provide fractional CFO or Controllership. We can also provide targeted, as-needed supplemental assistance to your accounting department.

Human Resource Solutions

Our human resource group can provide permanent, part-time leadership, complete management of your human resource needs or assist with the implementation or completion of specific projects.

The Next Step

Call us to explore your options. We welcome the opportunity to learn more about your organization.

Board Member Training

We realize not all board members have the exposure in the governance, regulatory and transparency issues that could be needed. Our professionals can train board members individually or in group settings on how to read financial statements and manage regulatory issues.

Why Bond Beebe?

We have the experience, we ask the right questions and we value communication. Our clients are not a number, we create deep and lasting relationships to help clients achieve and surpass their goals.
